To celebrate PRIDE month, HNE Health Libraries has strengthened our existing health-care related LGBTQ+ collection with a range of titles covering queer history and personal experience...

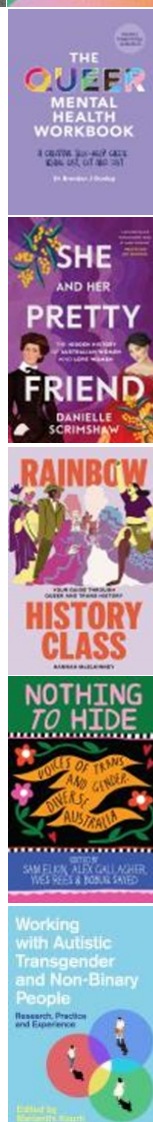

If you'd like to suggest another title, [please let us know...](#)

Here are a few of our recent ebook purchases:

- * [Pride: the story of the LGBTQ equality movement](#)
- * [Handbook of LGBTQ-affirmative couple and family therapy](#)
- * [Bi: bisexual, pansexual, fluid, and nonbinary youth](#)
- * [Queers, Bis, and Straight lies: an intersectional examination of LGBTQ stigma](#)
- * [Raising LGBTQ allies: a parent's guide to changing the messages from the playground](#)
- * [Between two worlds](#)
- * [The Queer mental health workbook: a creative self-help guide using CBT, CFT and DBT](#)
- * [She and her pretty friend: the hidden history of Australian women who love women](#)
- * [Rainbow history class: your guide through Queer and Trans history](#)
- * [Nothing to hide: voices of trans and gender diverse Australia](#)
- * [Queering your therapy practice: queer theory, narrative therapy, and imagining new identities](#)
- * [Working with autistic transgender and non-binary people: research, practice and experience](#)

We also have lots of older titles in print, including...

- * [A guide to transgender health: state-of-the-art information for gender-affirming people and their supporters](#) (LOCAL AUTHORS)
- * [Trans: exploring gender identity and gender dysphoria: a guide for everyone \(including professionals\)](#)
- * [Families in transition: parenting gender diverse children, adolescents, and young adults](#)

EBSCO eBook Nursing collection

The **EBSCO eBook Nursing collection** holds these LGBTQ+ titles:

- * Pocket guide for understanding LGBTQ mental health (2020)
- * LGBTQ-inclusive hospice and palliative care: a practical guide to transforming professional practice (2017)
- * LGBTQ cultures: what health care professionals need to know about sexual and gender diversity (2018)

Find them by searching the title in the ebooks portal on the [Library homepage](#)—then login using your HNE Health Libraries username (same as membership no.) / password. As you start typing a title in the search bar, the system auto-completes and offers title suggestions in a drop-down list. Clicking on the suggestion takes you straight to the book.

[Explore the catalogue](#) and the 'ebook' section of the [Library website](#) (listed under 'Quick links' to find even more fascinating titles. Log in with your HNE Health Libraries username (same as membership no.) / password to access ebooks – or to place requests in the catalogue for print books.

WHAT WORKS FOR ABORIGINAL AND TORRES STRAIT ISLANDER MEN?

Aboriginal and Torres Strait Islander men experience significantly higher rates of suicide, trauma, alcohol related deaths and unemployment than other Australian men. Despite significant levels of government intervention, rates of family violence, unemployment and incarceration continue to increase in Aboriginal and Torres Strait Islander communities. This systematic review seeks to understand what interventions, programs and activities are successful in improving the wellbeing of Aboriginal and Torres Strait Islander men and thereby the wellbeing of their communities.

SOURCE: Menges, J. et al. (2023) [What works for Aboriginal and Torres Strait Islander men? A systematic review of the literature](#). *Journal of the Australian Indigenous HealthInfoNet*, 4(2)

CULTURAL COLLECTIONS

HNE Health Libraries believe in the importance of sharing stories and experiences to promote reconciliation. To that end, we are working on improving the depth of our cultural collection.

Explore the catalogue and the 'ebook' section of the [Library website](#) to find lots of fascinating titles. Log in with your HNE Health Libraries username=membership no. / password to access ebooks – or to place requests in the catalogue for print books. If you have a title in mind that we don't hold, [please let us know...](#)

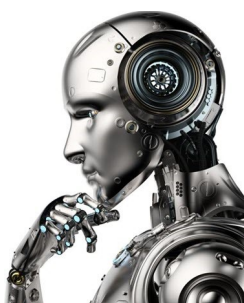

Just a few of the titles you can access now:

[All our relations: Indigenous trauma in the shadow of colonialism](#)
[Routledge handbook of Indigenous wellbeing](#)
[Culture, diversity and health in Australia: towards culturally safe health care](#)
[The Voice to Parliament handbook: all the detail you need](#)
[Our voices: Aboriginal social work \(PRINT\)](#)
[Sand Talk: how Indigenous thinking can save the world](#)
[Health care and Indigenous Australians: cultural safety in practice \(PRINT\)](#)
[Finding the heart of the nation: the journey of the Uluru Statement from the Heart continues](#)

WE NEED TO CHAT ABOUT ARTIFICIAL INTELLIGENCE

The authors of [this recent article in the Medical Journal of Australia](#) argue that using artificial intelligence (AI) effectively in healthcare will require retraining of the workforce, retooling health services, and transforming workflows. They believe it is vital to develop standards for AI tools that impact diagnosis and treatment of patients.

To that end, they have created the [Australian Alliance for AI in Healthcare](#) (AAAIH), a national collective of over 100 national and international partners and stakeholders in academia, government, consumer, clinical, industry organisations, and peak bodies. AAAiH has created [A Roadmap for AI in Healthcare for Australia](#), containing 24 recommendations across eight priority areas, covering critical issues such as safety, quality and ethics, industry development and consumer needs. Led by Enrico Coiera, Professor of Medical Informatics at Macquarie University, AAAiH has called on the Australian Government to develop clear plans and regulations for AI.

[Read more in the Conversation...](#)

Access GRAND ROUNDS presentations and EDUCATION sessions from your PC

HNE Health Libraries record and edit [Grand Round presentations](#) and [Departmental training / Education sessions](#) across a range of disciplines, delivered from sites all over the LHD.

We make them available on the Library website, so you can access them from your PC, at a time that suits you. Remote access to presentations is available to HNE Health Libraries members.

Recent presentations include:

- * Doctor, can I still drive?
- * Horses not zebras: Amyloidosis
- * Chronic widespread pain
- * "We can't cure cancer, we should give up, and stop trying"
- * Has the Towards Zero Suicides care pathway made a difference?
- * Collective trauma and its manifestations

WHY NATURE will NOT ALLOW the use of GENERATIVE AI in IMAGES and VIDEO

"The process of publishing — as far as both science and art are concerned — is underpinned by a shared commitment to integrity. That includes transparency. As researchers, editors and publishers, we all need to know the sources of data and images, so that these can be verified as accurate and true. Existing generative AI tools do not provide access to their sources so that such verification can happen... Saying 'no' to this kind of visual content is a question of research integrity, consent, privacy and intellectual-property protection." SOURCE: [Nature 618, 214 \(2023\)](#)

SEE ALSO (Nature 613, 612 (2023): [Tools such as ChatGPT threaten transparent science; here are our ground rules for their use](#)

FINAL year MEDICAL STUDENTS as AIM in ED

Local authors evaluate the Assistant in Medicine (AiM) programme and its impact on physician burden and productivity in the Calvary Mater Newcastle emergency department.

SOURCE: Senali Rupasinghe, Mustafa Majeed Omar & Ingrid Berling (2023) Final year medical students as Assistants in Medicine in the emergency department: a pilot study. *Emergency medicine Australasia*, published online Jan 19. doi: 10.1111/1742-6723.14173

NSW EMERGENCY PSYCHIATRY NETWORK

The NSW Emergency Psychiatry Network has been established by psychiatrists delivering services in the ED to drive closer collaboration between the psychiatric community, Emergency Medicine and ACEM, government and other stakeholders – to build a culture that puts patients first and urges investment in frameworks for research and evidence-based clinical care for patients with psychiatric symptoms in EDs across Australia.

Common ORTHOPAEDIC TRAUMA may explain PREHISTORIC remains

The fascinating discovery of skeletal remains in Borneo of an individual with absent left distal tibia, fibula and foot from 31,000 years ago has been proposed as evidence of a contemporaneous sophisticated amputation procedure. This item from local authors proposes that the skeletal findings in fact show the natural history of an injury pattern commonly encountered in blunt orthopaedic trauma, an open distal tibia/fibula fracture with growth-plate involvement.

SOURCE: Nicholas Murphy, Joshua Davis, Seth Tarrant & Zsolt Balogh (2023) [Common orthopaedic trauma may explain 31,000-year-old remains](#). *Nature*, 615(7952), E13–E14

CTCA in a RURAL REFERRAL HOSPITAL

This article describes the first 9 months of a newly established computed tomography coronary angiogram (CTCA) program at Tamworth Rural Referral Hospital.

SOURCE: Michael McLucas, James King & Michael McGee (2023) Computed tomography coronary angiography in rural referral hospitals: a single-centre experience. *Australian journal of rural health*, published online Apr 20. doi: 10.1111/ajr.12987
Available via CIAP—[Easy access using Library membership](#)

GUIDE to the CLINICAL TRIALS journey

The Clinical Trials Roadmap is an interactive and evolving resource developed by NSW Regional Health Partners, for researchers and health care professionals who may be new to clinical trials, or who require assistance to plan, develop and conduct clinical trials in a public health organisation. [Find out more...](#)

Milton: Taylor & Francis Group; 2023.

Improving CARE in EARLY PSYCHOSIS

The new [Australian Early Psychosis Collaborative Consortium](#) aims to develop national infrastructure (clinical quality registry, clinical trials and translation network, and lived experience network) to enable delivery of the highest quality early psychosis care, and expand and translate evidence more quickly and efficiently.

SOURCE: Thompson, A. et al. (2023) [The Australian Early Psychosis Collaborative Consortium \(AEPCC\): improving clinical care in early psychosis](#). *Australasian psychiatry*, 31(3), 306–308

We are always looking for ways to better support our patrons – so here is your chance to let us know what you think. We're interested in your comments on all

things Library-related: from accessibility of resources, to topics for the newsletter...

We're particularly interested in your use of RR3 (RNC). How often do you use it? What do you use it for? If the room was no longer available, where would you work? We will forward all comments on RR3 to both the JHH Executive and the JHHIP teams.

Please scan the QR code or [use this link](#) to provide feedback on all topics via the Library website.

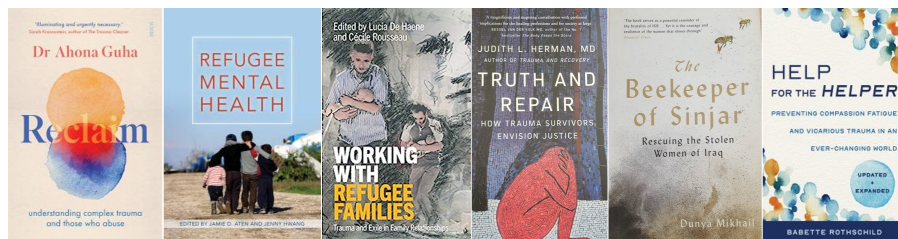

SPORTS INJURY in AUSTRALIA

In 2020–21, about 66,500 sports injuries led to a hospital stay in Australia. [This report from AIHW](#) describes the people who were hospitalised, the sports they were playing, and the types of injuries they sustained. 10-year trends and seasonal differences are illustrated and sports participation and rates of injury are discussed.

Topics include: "Creating a publication-ready manuscript", and "How to improve your literature searching with PICO"...

NEW SCORING SYSTEMS

The production of RCTs and guidelines is a complex task, and there are a multitude of methods, some more rigorous than others. TRIP aims to help users make sense of the evidence-base by creating new scoring graphics. The [RCT score](#) transforms the likely risk of bias (RoB) into a linear scale.

The [guideline score](#) has been improved to help users understand how robust a guideline might be.

BEST-PRACTICE ACCESS to SERVICES for CALD PEOPLE with DISABILITY

In an effort to identify best practice in providing access to services (justice, disability services, education and settlement services) for people with disability from culturally and linguistically diverse (CALD) backgrounds, the Royal Commission into Violence, Abuse, Neglect and Exploitation of People with Disability funded a study in consultation with key stakeholders. [Find out more...](#)

TROVE is SAFE

[The announcement of federal government funding for Trove](#) has come as an enormous relief to not only the library and information sector, but all those who use and recognise the value of this essential infrastructure.

HNE HEALTH LIBRARIES CAN...

- Help you ask the right questions
- Assist you in selecting the right sources of evidence
- Teach you how to effectively use a range of databases and other evidence-based resources
- Explain how to identify and critically appraise evidence
